

Down to Earth® is a tile with Texture.

In order to achieve a more dramatic effect in the look of your *Down to Earth* installation *you may choose to leave grout embedded in the depressions of the tile.* ①

A contrasting grout color will produce a more pronounced appearance. ②

IF you desire to enhance the appearance of the tile created by grouting the texture, it is important that you *do not overclean the surface of the tile.* ③

Simply *wipe across the surface of the tile taking care not to remove excess grout* from the texture voids. ④

Also, *do not use any acid based cleaners* when cleaning a textured tile. ⑤

You may also want to *seal the floor, after it has been thoroughly cleaned, with a penetrating sealer to help protect and preserve the entire installation.* ⑥

1201 Millerton Street SE, Canton Ohio 44707 Phone: 1.800.325.3945 or 330.484.8453 • Fax: 330.484.3584
